

I am disturbed by the prospect that my XM service could be diminished in any way. I pay for a premium service and resent that a broadcasting organization (NAB) is trying yet again to further the prospects of companies with deep pockets. I think I have the right to hear local weather, news and anything else I choose is a constitutional right. It all comes down to greed and I will always support private technology promoting companies like XM because they lead us to the next generation of technology, not keep trying to repackage and sell us the past.
